BIOGRAPHY

- Specialty: Structural Design
- Seven years of professional experience
- BS, Structural Design and Construction Engineering Technology, Pennsylvania State University, 2006
- AS, Architectural Engineering Technology, Pennsylvania State University, 2003

Suzanne Firestone is a Pennsylvania engineer-in-training with a strong background in structural design for various transportation projects, including structural calculations, quantities, specifications, and cost estimates. She has designed structures of various types and sizes under design-bid-build and design-build contracts, including both bridges and retaining walls. Since joining Erdman Anthony, she has served as structural designer for several projects in PennDOT Districts 10-0 and 11-0. She has also assisted with the review of preliminary bridge design documents created by other consultants on behalf of PennDOT and provided load rating analysis for a variety of bridge types.
