## BIOGRAPHY

- Specialty: Transportation Engineering
- Licensed Professional Engineer in New York, Vermont, Florida, Maine
- BS, Civil Engineering, Clarkson University, 1987
- AAS, Engineering Science, State University of New York at Canton, 1985

Bill McCormick has spent over 28 years developing his expertise in transportation and traffic engineering. He has extensive knowledge in roadway intersection layout/design, maintenance/protection of traffic during construction, and preparation of construction documents. He has served as Project Manager for more than five major highway projects with a construction value ranging from \$5 million to \$34 million and participated as Project Manager for many traffic-study and design projects. Bill has also managed jobs for LAFA and NYSDOT Federal Aid projects, with responsibility for client contact, sub-consultant coordination, scope, schedule, budget, and completion of design tasks. His skills include alternatives development/ assessment, horizontal/vertical geometry, traffic-signal design, design approval document preparation, and community participation. Typically, as Principal In Charge now, Bill is responsible for coordination with project managers, quality control oversight, and providing technical guidance along the way.
