BIOGRAPHY

- Specialty: Construction Engineering and Inspection Services
- Licensed Professional Engineer in Pennsylvania
- 13 years of professional experience
- Engineering With Quality, 2000
- BS, Civil Engineering, Pennsylvania State University, 1999

Tim Fahrney has assisted with construction services management starting in 2003, and in November 2011 he assumed responsibility for the management of Erdman Anthony's construction services throughout the Atlantic Region. During the summer construction season in Pennsylvania alone, he has overseen a staff that often totals more than 80 construction inspectors serving PennDOT, the Pennsylvania Turnpike, and other clients throughout the state. In his construction services role, he has maintained strong relationships with a growing client base, while managing the field personnel assigned to a wide range of projects and providing overall contract administration. Prior to joining the Construction Services Group, Tim provided structural design and bridge inspection services.
